HANDBOOK OF BADI KATORI

Confidentiality & Non-Disclosure Notice

To ensure the protection of our brand's operational integrity and proprietary information, all members of the **Badi Katori Family** must adhere to the following confidentiality protocols regarding this handbook:

1. **Restricted Access:** This document is intended exclusively for the internal use of Badi Katori employees, franchisees, and authorized partners; sharing with any individual or entity outside this circle is strictly prohibited.
2. **Proprietary Protection:** The contents herein—including specialized SOPs, recipes, pricing structures, and marketing strategies—constitute trade secrets that are vital to our competitive advantage.
3. **Digital Security:** Unauthorized digital reproduction, scanning, or distribution of this handbook via social media, email, or messaging platforms to external parties is a violation of company policy.
4. **Ownership of Information:** All information contained within this handbook remains the sole intellectual property of Badi Katori and must be returned or deleted upon the termination of the professional relationship.
5. **Legal Obligation:** Any breach of these confidentiality terms may result in formal disciplinary action, termination of the franchise agreement, or legal proceedings to protect the brand's interests.

Badi Katori | Official Operations Handbook

The Blueprint for Taste & Excellence

Table of Contents

1. Brand Vision & Culture

- Welcome to the Badi Katori Family
- Our Commitment to Quality & Consistency
- Confidentiality & Non-Disclosure Agreement

2. Standard Operating Procedures (SOPs)

- **Front-of-House (FOH):**
  - Opening and Closing Checklists
  - Order Management via Petpooja
  - Customer Service & Grievance Handling
- **Back-of-House (BOH):**
  - Inventory Management & Upfront Ordering
  - Zomato & Swiggy Order Dispatch Protocols
  - Equipment Maintenance & Safety

3. The Recipe Vault (Proprietary)

- **Signature Fried Items:**
  - Preparation & Frying Temperatures
  - Plating & Presentation Standards
- **Beverage Menu:**
  - Mixing Ratios for Branded Drinks
  - Usage of Branded Glassware & Lids
- **Packaging Standards:**
  - Delivery vs. Dine-in Packaging Guides

4. Hygiene & Food Safety Standards

- **Personal Grooming:**
  - Uniform, Hairnet, and Glove Protocols
- **Kitchen Sanitation:**
  - Daily Deep-Cleaning Schedule
  - Oil Quality Monitoring & Disposal
- **Storage Protocols:**
  - FIFO (First-In, First-Out) Method
  - Managing 1-Year Shelf Life Frozen Stock

5. Administration & Compliance

- Employee Register & Attendance
- Franchise Transfer & Audit Policies
- Official Contact Directory (Surat Headquarters)

1. Brand Vision & Culture

Welcome to the Badi Katori Family

To: Our Valued Franchise Partner

Subject: A Warm Welcome to the Badi Katori Journey

Dear Partner,

It is with great pride and excitement that we officially welcome you to the **Badi Katori Family**.

When we started Badi Katori, our vision was to create more than just a food brand; we wanted to build a legacy of taste, trust, and togetherness. Today, as you join us, that vision grows stronger. By choosing to partner with us, you aren't just opening an outlet—you are becoming a vital guardian of our flavors and our values.

At Badi Katori, we believe that our success is fundamentally tied to yours. Whether it is through our specialized frozen food innovations, our branded beverages, or our streamlined operations in Surat and beyond, every tool in this handbook is designed to help you thrive. We are committed to standing by you, providing the support, marketing insights, and operational excellence needed to make your outlet a local favorite.

Being part of this "family" means we move forward together. We value your dedication to maintaining the high standards of hygiene and service that define us. In return, we promise transparency, constant innovation, and a partnership built on mutual respect.

We are thrilled to have you on board. Let’s work together to serve happiness, one "Katori" at a time.

Welcome home!

With Warm Regards,

The Founder & Leadership Team

Badi Katori

“Growing together, serving excellence.”

Our Commitment to Quality & Consistency

At **Badi Katori**, our reputation is built on a single promise: **The perfect taste, every single time.** Whether a customer visits an outlet in Vesu, Adajan, or Varachha, they expect the same crunch, the same aroma, and the same premium experience. Consistency is not just a goal; it is the foundation of our brand.

To honor this commitment, we adhere to these **Four Pillars of Excellence**:

---

1. Standardized Sourcing

We ensure that every outlet uses identical, high-quality ingredients. By centralizing the supply of our signature frozen items and proprietary spice blends, we eliminate the risk of taste variation. If it isn’t from the Badi Katori central supply, it isn't Badi Katori.

2. Precision in Preparation (SOPs)

Great food is a science. Our Standard Operating Procedures (SOPs) dictate exact frying temperatures, precise mixing ratios for beverages, and strict plating guidelines. Following these steps ensures that our signature quality is never left to "guesswork."

3. The 1-Year Quality Shield

We utilize advanced freezing technology to ensure our products maintain a **1-year shelf life** without compromising on freshness or nutritional value. This allows every franchise to serve food that tastes exactly as the founder intended—fresh, safe, and delicious.

4. Continuous Monitoring & Audits

Quality is a journey, not a destination. Through regular audits, feedback from our Surat-based micro-influencer campaigns, and real-time data tracking via our POS systems, we constantly monitor performance. We provide the training and tools necessary to correct any deviations before they reach the customer’s plate.

Our Pledge:

"Quality is doing it right when no one is looking." We pledge to never take shortcuts, never compromise on ingredients, and always prioritize the customer's trust above all else.

Confidentiality & Non-Disclosure Agreement (NDA)

This agreement is a formal commitment to protect the "Badi Katori" legacy. By being part of the Badi Katori family, you are entrusted with proprietary secrets that give us our competitive edge in the culinary market.

---

1. Definition of Confidential Information

Confidential information includes, but is not limited to:

- **Recipes & Blends:** Secret spice ratios, marination techniques, and beverage mixing formulas.
- **Operational Data:** Standard Operating Procedures (SOPs), kitchen manuals, and employee training materials.
- **Business Strategies:** Franchise pricing, revised Zomato/Swiggy rate structures, and upcoming menu launch details.
- **Marketing Assets:** Internal micro-influencer lists, barter collaboration terms, and Surat-specific campaign data.

2. Non-Disclosure Obligations

- **Internal Use Only:** You agree to use confidential information solely for the purpose of operating your authorized Badi Katori outlet.
- **No External Sharing:** You shall not disclose, reveal, or share any part of this handbook or internal processes with third parties, competitors, or media outlets without prior written consent from the founder.
- **Digital Protection:** You agree not to photograph, photocopy, or digitally distribute sensitive documents (like this handbook) via social media or messaging platforms to anyone outside the Badi Katori family.

3. Protection of Trade Secrets

You acknowledge that our specialized frozen food technology (offering a **1-year shelf life**) and our specific branding methods (specialized glassware and lids) are unique to Badi Katori. Any attempt to replicate or leak these processes to external suppliers is strictly prohibited.

4. Term & Termination

This duty of confidentiality remains in effect throughout your association with Badi Katori and continues to be legally binding even after the termination of your employment or franchise agreement. Upon exit, all physical and digital copies of confidential manuals must be returned or destroyed.

5. Consequences of Breach

Any violation of this agreement undermines the hard work of the entire Badi Katori family. Breach of confidentiality will result in:

1. Immediate termination of the franchise agreement or employment contract.
2. Legal action for damages and injunctive relief.
3. Permanent blacklisting from future brand associations.

Acceptance of Terms

I understand that I am being trusted with the "inner workings" of Badi Katori. I pledge to guard this information with the highest level of integrity.

2. Standard Operating Procedures (SOPs)

Front-of-House (FOH): Opening & Closing Checklists

To ensure every customer experiences the same high standard of service from the moment we open until the moment we close, all staff must strictly follow these daily checklists.

A. Morning Opening Checklist

Goal: To prepare the outlet for the first customer and ensure 100% operational readiness.

1. **Premises & Ambiance:**
    - Unlock the outlet and conduct a quick walkthrough.
    - Switch on all lights, fans/AC, and signage boards.
    - Ensure the entrance, floor, and seating area are swept and mopped.
    - Wipe down all tables and chairs with food-grade sanitizer.
2. **Counter & Tech Setup:**
    - Log in to **Petpooja** (POS) and check for any pending updates.
    - Verify internet connectivity and ensure the receipt printer has enough paper.
    - Open the cash drawer and count the "Opening Float" (petty cash) to ensure accuracy.
3. **Delivery Platform Readiness:**

- Switch on **Zomato and Swiggy** tablets.
- Verify that the menu is "Online" and all items (including the New Menu items) are marked as "Available."

4. **Display & Stock:**
    - Wipe down the display counter and ensure branded glassware is arranged neatly.
    - Check tissue dispensers and condiment bottles (ketchup/sauces); refill as needed.
    - Ensure the "Badi Katori Family" marketing materials/standees are positioned correctly.

B. Night Closing Checklist

Goal: To secure the outlet and ensure a smooth start for the next morning.

1. **Financial Reconciliation:**
    - Perform the "Day-End" (Z-Report) on Petpooja.
    - Tally physical cash, card payments, and UPI transactions against the system report.
    - Record any discrepancies in the daily log for the Outlet Manager.
2. **Kitchen & FOH Cleanup:**
    - Clear all tables and ensure no food waste is left in the seating area.
    - Dispose of the day's trash in the external bin; replace liners in all dustbins.
    - Ensure the beverage station is wiped clean and all lids/caps are tightly sealed.
3. **Inventory Check:**
    - Conduct a quick count of high-moving items and note if any frozen stock needs to be ordered (refer to the **Upfront Payment** policy for reordering).
    - Ensure all beverage bottles and glassware are accounted for.
4. **Safety & Utilities:**
    - Switch off the Zomato/Swiggy tablets (mark "Closed").

- Turn off all kitchen appliances (fryers/induction) following safety protocols.
- Switch off ACs, lights, and signage.
- **Final Step:** Double-check all locks on the main door and shutters.

Management Note:

Consistent execution of these checklists reduces errors and maintains the professional image of the Badi Katori brand. Every "Opening" and "Closing" must be signed off by the Shift Lead in the daily register.

To ensure the high standards of the **Badi Katori** brand, this checklist clearly defines the specialized roles of our team. The addition of the **Ustaad** ensures that our core flavor profiles and fried items remain consistent across all Surat outlets.

---

1. Outlet Incharge (1 Person)

Focus: Admin, Cash, and Digital Platforms

Morning Opening:

- **Systems Check:** Log into **Petpooja**; verify the "New Menu" rates and "Item Availability."
- **Online Platforms:** Turn on Zomato/Swiggy tablets; ensure the outlet is "Live" and the "Badi Katori" branding is visible.
- **Cash Audit:** Count the opening cash float and ensure the billing printer has paper rolls.
- **Team Huddle:** Conduct a 2-minute "Badi Katori Family" briefing on the day's targets and micro-influencer orders.

Night Closing:

- **Financial Settlement:** Tally physical cash/UPI against the Z-Report. Record any discrepancies.
- **Inventory Ordering:** Finalize the frozen food and beverage order for the next day (Process: **Upfront Payment**).
- **Platform Close:** Mark "Closed" on delivery apps and check for any pending customer complaints.
- **Facility Lock-up:** Ensure all ACs and lights are off; physically lock the shutters.

---

2. Ustaad (The Master Chef - 1 Person)

Focus: Food Quality, Frying Standards, and Secret Recipes

Morning Opening:

- **Oil Management:** Inspect the oil quality in the fryers. Refill or replace to ensure the perfect "Badi Katori" crunch.
- **Core Prep:** Check the status of the frozen food (1-year shelf life items). Ensure proper thawing techniques are followed.
- **Secret Blends:** Prepare the proprietary Badi Katori spice mixes and chutneys for the day.
- **Equipment Calibration:** Test the frying temperatures and induction settings for consistency.

Night Closing:

- **Oil Safety:** Turn off all fryers and cover them properly after they have cooled down.
- **Stock Security:** Ensure all proprietary spices and "Badi Katori" signature items are sealed and stored in the refrigerator.
- **Hygiene Audit:** Inspect the kitchen prep area for cleanliness before the Housekeeping boy begins the deep clean.
- **Waste Reporting:** Note any food wastage to help the Incharge with future inventory planning.

---

3. Chaat Counter Boys (2 Persons)

Focus: Assembly, Beverages, and Customer Service

Morning Opening:

- **Assembly Station:** Arrange the "Katoris," curd, and toppings. Ensure the setup is neat for "open-kitchen" viewing.
- **Beverage Bar:** Arrange the **branded beverages** and ensure the **specialized glassware with lids** is polished and ready.
- **Packaging Prep:** Keep a stack of delivery bags and branded lids ready for peak-hour Zomato/Swiggy rushes.
- **Sample Prep:** (If applicable) Prepare small samples for tasting as per the marketing strategy.

Night Closing:

- **Perishable Care:** Properly seal and store remaining curd, garnishes, and prep items in the chiller.
- **Counter Sanitation:** Scrub the assembly counter and wash all serving spoons and beverage mixing tools.
- **Glassware Count:** Clean and stack the branded glasses; report any breakages to the Incharge.
- **Station Reset:** Ensure the counter is completely clear of any food debris to prevent pests.

---

4. Housekeeping Boy (1 Person)

Focus: Floor Care, Waste, and Exterior Shine

Morning Opening:

- **Floor Deep-Clean:** Mop the entire outlet (Front & Back) using approved disinfectants.
- **Entrance Glass:** Clean the glass doors and the main "Badi Katori" signage for a "crystal clear" look.
- **Furniture Polish:** Wipe down tables and chairs to remove any dust or previous-night stains.
- **Waste Setup:** Line all bins with fresh bags and ensure the hand-wash area is stocked with soap.

Night Closing:

- **Garbage Disposal:** Clear all wet and dry waste bins and dispose of them at the designated municipal point.
- **Floor Scrubbing:** Use heavy-duty cleaners to remove oil/spills near the Ustaad's frying station.
- **Utility Safety:** Ensure all water taps are tightly closed and the washbasin area is dry.
- **Exterior Sweep:** Clean the area immediately outside the shutter to ensure a clean brand image.

Authorization: The **Outlet Incharge** must sign off on these tasks in the **Employee Register** before the shift ends. Unfinished tasks must be reported immediately.

Order Management via Petpooja

To maintain the efficiency of the **Badi Katori** family outlets and ensure accurate data for our Excel-based campaign tracking, every team member must follow this standardized process for the Petpooja POS system.

---

1. Order Entry & Punching

- **Dine-In:** Orders must be punched into the system *before* the food is prepared. Ensure the table number and the number of guests are accurately recorded.
- **Takeaway:** Select the "Takeaway" mode to ensure the correct packaging charges (for branded lids and bags) are applied automatically.
- **Menu Accuracy:** Always select the correct item from the **New Menu** section. Never use "Miscellaneous" or "Open Item" buttons, as this disrupts our inventory tracking.

2. Digital Platform Integration (Zomato & Swiggy)

- **Auto-Accept:** Ensure the "Auto-Accept" feature is toggled **ON** to prevent order cancellations and maintain our high ranking on delivery apps.
- **Price Syncing:** Verify that the rates displayed in Petpooja match the **Revised Zomato/Swiggy Rates** provided by the Surat head office.

- **Item Marking:** If a specific item is out of stock (e.g., a particular beverage or a frozen specialty), mark it "Out of Stock" in the Petpooja dashboard immediately to avoid customer disappointment.

3. Payment Processing

- **Mode of Payment:** Correctly tag the payment method—**Cash, Card, or UPI**. This is critical for the Incharge to tally the Z-Report at the end of the night.
- **Discounting:** Any discounts (e.g., for micro-influencers or barter collaborations) must be authorized by the Outlet Incharge and recorded under the "Marketing/Barter" category in the POS.
- **Receipts:** A printed receipt must be provided to every customer. For delivery orders, the bill must be stapled securely to the branded Badi Katori bag.

4. KOT (Kitchen Order Ticket) Workflow

- **Ustaad's Instruction:** Once an order is punched, the KOT will automatically print at the Ustaad's station.
- **Priority Management:** The Ustaad must prioritize KOTs based on the "Time Elapsed" shown on the Petpooja Kitchen Display (if applicable) or the order sequence to ensure a fresh, hot experience.
- **Special Instructions:** Always check for customer notes (e.g., "Less Spicy" or "Extra Chutney") on the KOT before assembly.

5. Inventory & Real-Time Tracking

- **Stock Consumption:** Because we use an **Upfront Payment** model for supplies, it is vital to keep Petpooja inventory updated. The system will automatically deduct frozen food portions and beverage counts as orders are punched.
- **Wastage Logging:** Any food dropped, burned, or returned must be logged in the "Wastage" module of Petpooja by the Outlet Incharge to maintain an accurate stock count for the next order cycle.

Pro-Tip for Incharges:

At the end of each day, export the **Daily Sales Report** to the shared Google Sheet. This allows the central team to monitor the success of our micro-influencer campaigns and ensure our Surat outlets are performing at their peak.

Customer Service & Grievance Handling

At **Badi Katori**, we don’t just serve food; we serve an experience. Every interaction is an opportunity to make a customer feel like part of our family. To streamline our loyalty and feedback, we utilize the **Reelo System** to track customer satisfaction and reward repeat visits.

---

1. The "Badi Katori" Service Standard

- **The Greeting:** Every customer must be greeted with a warm smile and a standard welcome: *"Welcome to the Badi Katori Family!"*
- **Menu Guidance:** If a customer is new, the Counter Boy should suggest our signature items from the **New Menu** and explain the uniqueness of our "Katoris."
- **Wait Time Transparency:** Always inform the customer of the expected prep time (e.g., *"Your fresh chaat will be ready in 5-7 minutes"*).

---

2. The Reelo Loyalty & Feedback System

We use **Reelo** to turn every walk-in customer into a regular guest.

- **Data Collection:** For every bill, the Counter Boy must politely ask for the customer's mobile number: *"Sir/Mam, may I have your number for your Badi Katori loyalty points and a digital bill?"*
- **Points Enrollment:** Ensure the number is entered into the Reelo-integrated POS. Explain that points can be redeemed for future treats.
- **Feedback Loop:** After the visit, Reelo sends an automated feedback link. The Outlet Incharge must review these ratings daily.
    - **5-Star Ratings:** Can be shared on our social media or sent to our micro-influencers.
    - **Low Ratings:** Must be addressed immediately (see Grievance Handling below).

---

3. Grievance Handling (The L.A.S.T. Method)

If a customer is unhappy with the food quality, taste, or service, follow these four steps:

1. **L - Listen:** Let the customer speak without interruption. Whether it's about a Zomato delivery delay or the spice level of a chaat, give them your full attention.
2. **A - Apologize:** Use a sincere apology. *"I'm sorry that your experience wasn't up to our Badi Katori standard today."* Do not give excuses.
3. **S - Solve:**
    - **Food Issue:** If the taste isn't right, the Ustaad should immediately replace the dish with a fresh one.
    - **Service Issue:** Offer a complimentary branded beverage or a small discount on the next visit via the Reelo system.
4. **T - Thank:** Thank them for bringing the issue to your attention. *"Thank you for helping us improve. We hope to see you again soon."*

---

4. Handling Digital Grievances (Zomato/Swiggy)

- **Packaging Complaints:** If a customer complains about spills, check if the **specialized lids** were applied correctly.
- **Missing Items:** If an item is forgotten, the Outlet Incharge must contact the customer immediately, apologize, and offer a Reelo coupon code for their next order to compensate.
- **Bad Reviews:** Respond to all online reviews within 24 hours. Keep responses professional, humble, and solution-oriented.

---

5. Escalation Matrix

If a grievance cannot be resolved at the outlet level:

1. **Level 1:** Outlet Incharge attempts resolution.
2. **Level 2:** If the customer remains unsatisfied, the Incharge must take the customer's details and inform them that the **Surat Head Office** will contact them within 24 hours.
3. **Reporting:** All major grievances must be logged in the "Complaints" tab of your daily Excel report.

Staff Reminder:

A happy customer tells 3 people, but an unhappy customer tells 10. Use the Reelo system to stay connected and always choose kindness.

Back-of-House (BOH): Inventory Management & Upfront Ordering

In the **Badi Katori** ecosystem, the Back-of-House (BOH) is the engine that drives our consistency. Because we use specialized frozen technology with a **1-year shelf life**, our inventory management is focused on precision and maintaining a "Zero Stock-Out" environment.

---

1. The Upfront Ordering System

To ensure a smooth supply chain and high-quality standards, Badi Katori operates on a strict **Pre-Paid Supply Model**.

- **Ordering Cycle:** The Outlet Incharge must review stock levels every Monday and Thursday.
- **Payment Protocol:** Orders for frozen base products, proprietary spices, and branded packaging (specialized glassware/lids) are only processed once the **Upfront Payment** is confirmed via the central banking channel.
- **Lead Time:** Always allow a 24-48 hour window for delivery within Surat. Never wait until the last packet is opened to place an order.

---

2. Inventory Tracking (Excel & Petpooja)

- **Daily Opening Stock:** The Ustaad must count the main frozen items (Katori bases, signature fillings) every morning.
- **Digital Sync:** The Outlet Incharge must ensure the physical count matches the "Stock-in-Hand" data on **Petpooja**.
- **Excel Reporting:** At the end of each week, the total consumption versus sales must be entered into the **Excel Campaign Tracker**. This helps the head office analyze if high-traffic micro-influencer visits are impacting specific stock items.

3. Storage & The "1-Year Shelf Life" Rule

Our frozen products are designed to last, but only if stored correctly.

- **Temperature Control:** Deep freezers must be maintained at **-18°C or below**. The Ustaad must check the thermometer thrice daily (Opening, Peak Hour, Closing).
- **FIFO Method (First-In, First-Out):** New stock must always be placed *behind* or *under* older stock. This ensures that no item exceeds its quality window, even with a long shelf life.
- **Thawing Protocol:** Only thaw the amount of stock required for a 4-hour window. Re-freezing thawed items is strictly prohibited as it destroys the texture and safety of the "Badi Katori" experience.

---

4. Branded Asset Management

Inventory isn't just food—it's also how we present it.

- **Beverage Glassware:** These are premium assets. The Housekeeping boy and Chaat Counter boys must track the count of glasses. Any breakage must be logged as "Wastage" in Petpooja.
- **Lids & Packaging:** Since we have revised our Zomato/Swiggy packaging, ensure that the count of "Specialized Lids" matches the number of beverage bottles ordered.

---

5. Quality Rejection Criteria

Upon receiving a delivery from the central supply, the Outlet Incharge must inspect the items. **Reject stock if:**

1. The vacuum packaging of frozen items is torn or bloated.
2. The "Manufactured Date" is missing.
3. The branded glassware arrives cracked or chipped.
4. There are signs of "Freezer Burn" (excessive ice crystals inside the packet), indicating a temperature fluctuation during transport.

BOH Golden Rule:

"If you don't measure it, you can't manage it." Accurate inventory ensures that we never have to say "No" to a customer or a micro-influencer during a high-profile launch.

Zomato & Swiggy Order Dispatch Protocols

Managing digital orders requires speed, accuracy, and perfect presentation. Since we have **revised our Zomato & Swiggy rates** and updated our packaging, following these protocols is essential to maintain our high ratings and minimize "bad experience" refunds.

---

1. Order Receipt & Preparation

- **Instant Acceptance:** Orders must be accepted on the tablet within **60 seconds**.
- **The "New Menu" Sync:** The Outlet Incharge must ensure the items ordered match the current versions from the **New Menu** launch.
- **KOT Generation:** As soon as the order is accepted, the **Ustaad** must receive the KOT and begin frying or assembly immediately to meet the "Food Prep Time" (EPT).

2. Quality Control (QC) Before Packing

Before any item goes into a bag, the **Chaat Counter Boy** must perform a "Final Look" check:

- **Temperature:** Are the fried items hot and crispy? (Cold fried food is the #1 cause of 1-star reviews).
- **Customizations:** Check the "Customer Notes" on the tablet for requests like "No Onion," "Extra Spicy," or "Send Cutlery."
- **Portioning:** Ensure the "Badi Katori" signature base is filled to the standard level—consistency across Surat is our priority.

3. Specialized Packaging Standards

We have invested in premium branding to ensure our food survives the Surat traffic.

- **Spill-Proof Beverages:** Use only the **specialized glassware and lids** with the Badi Katori branding. Ensure the lid is "clicked" into place to prevent leaks during transit.
- **Crispiness Retention:** Use vented packaging for fried items so they don't get soggy from steam.
- **Secure Sealing:** Every bag must be sealed with a **Badi Katori brand sticker** or stapled with the bill in a way that the customer can tell if it has been tampered with.

4. Dispatch & Rider Coordination

- **Marking "Ready":** Only mark the order as "Food Ready" on the tablet once the bag is completely packed and sealed. Marking it ready too early frustrates riders and triggers platform penalties.
- **Rider Interaction:** Treat delivery riders as part of the extended **Badi Katori Family**. Greet them politely and verify the **Order ID** (last 4 digits) before handing over the bag.
- **Handover Check:** Ask the rider to place the bag upright in their thermal carrier. Remind them: *"This contains beverages, please handle with care."*

5. Handling Delays & Issues

- **Preparation Delays:** If a dish is taking longer than expected, the Outlet Incharge should use the "Help" or "Call Rider" feature to keep the customer informed.
- **Out-of-Stock Items:** If an item is unavailable, call the customer immediately to offer a replacement from the **New Menu** instead of just cancelling the order.
- **Correction Tracking:** Every cancelled order or "Missing Item" complaint must be logged in the **Daily Excel Sheet** for the weekly operations review.

The Delivery Goal:

When a customer opens a Badi Katori bag at home, it should look and taste exactly as it does at our counter. **Perfect packing = Repeat orders.**

Equipment Maintenance & Safety

At **Badi Katori**, our equipment is the heart of our kitchen. Proper maintenance ensures that our "Ustaads" can deliver the perfect crunch every time, while strict safety protocols protect our "Badi Katori Family" from workplace hazards.

1. Daily Equipment Care

- **Fryers & Induction Units:**
  - **Morning:** Check for any frayed wires or oil leaks before switching on.
  - **Night:** Wipe down the exterior surfaces once cooled. Never use a dripping wet cloth near electrical panels.
- **Deep Freezers (-18°C):**
  - Wipe the door gaskets (rubber seals) to ensure they are airtight. This preserves our **1-year shelf life** stock.
  - Avoid keeping the door open for extended periods to prevent "Freezer Burn" on our frozen bases.
- **Petpooja POS & Tablets:**
  - Clean screens only with a dry microfiber cloth.
  - Ensure charging cables are organized and not stretched, preventing port damage.

---

2. Preventive Maintenance Schedule

To avoid "Peak Hour" breakdowns, we follow a strict calendar:

- **Weekly Deep Clean:** Every Sunday night, the **Ustaad** must oversee a complete oil filtration and deep-scrub of the fryer vats.
- **Monthly Technical Audit:** A certified technician will visit each Surat outlet to check the gas lines, electrical load, and refrigeration compressors.
- **Filter Cleaning:** AC and exhaust chimney filters must be cleaned every 15 days to maintain air quality and prevent grease-fire hazards.

---

3. Fire & Electrical Safety

- **Oil Safety:** Never fill the fryer above the "MAX" line. If the oil begins to smoke excessively, turn off the power immediately.

- **Fire Extinguishers:** Every outlet must have at least one **Class K (Kitchen)** or **CO2 fire extinguisher** near the exit. All staff must know how to pull the pin and use it.
- **Water & Electricity:** The **Housekeeping boy** must ensure the floor around the electrical main board and induction units is always dry.

---

4. Personal Safety Protocols

- **Protective Gear:** The **Ustaad** and **Counter Boys** must wear closed-toe, non-slip shoes to prevent falls on oily surfaces.
- **First Aid Kit:** A fully stocked first aid kit (with burn cream, bandages, and antiseptic) must be kept at the billing counter, managed by the **Outlet Incharge**.
- **Lifting Technique:** When moving heavy crates of beverages or bulk frozen stock, always bend at the knees—never the back.

---

5. Emergency Shutdown Procedure

In the event of a gas leak, electrical spark, or fire:

1. **Switch Off:** Hit the main electrical breaker and close the main gas valve.
2. **Evacuate:** Calmly lead customers to the assembly point outside.
3. **Report:** Once safe, the **Outlet Incharge** must immediately call the **Surat Head Office** emergency line.

Safety Motto:

"Speed is good, but safety is better." No order is more important than the well-being of our team and customers. Maintain your tools, and they will take care of the business.

3. The Recipe Vault (Proprietary)

Standard Operating Procedure (SOP): Deep Fried Appetizers & Patties & ***Beverage Menu & Mixing Ratios for Branded Drinks & Usage of Branded Glassware & Lids***

To maintain the signature **Badi Katori** crunch and ensure consistency across all Surat outlets, the **Ustaad** and **Chaat Counter Boys** must strictly adhere to these frying parameters and serving portions.

---

1. Pre-Frying Preparation

- **Oil Check:** Ensure the fryer is filled with clean oil to the "MAX" line.
- **Temperature Calibration:** Preheat the fryer until the thermostat indicates exactly **170°C**. Frying at lower temperatures will result in oily, soggy products.
- **Frozen Handling:** Take the product directly from the deep freezer (**-18°C**). Do not thaw these items unless specifically instructed, as they are designed to be fried from frozen to maintain their **1-year shelf life** quality.

---

2. Frying & Portioning Table

No.	Product Name	Frying Time	Temp (°C)	Serving Size (Qty/Weight)	Accompaniments (Dips)
1	**French Fries**	4 Mins	170	150 GM	Ketchup
2	**Chilli Garlic Pops**	4 Mins	170	150 GM	Ketchup & Chipotle
3	**Veggie Sticks**	4 Mins	170	150 GM (6 Pcs)	Ketchup & Chipotle

4	**Mozzarella Sticks**	4 Mins	170	4 Pcs	Ketchup & Chipotle
5	**Hara Bhara Kebab**	4 Mins	170	6 Pcs	Green Chutney & Schezwan
6	**Jalapeno Cheese Poppers**	4 Mins	170	10 Pcs	Chipotle Sauce
7	**Classic Patty**	4 Mins	170	1 Pcs	*As per Burger/Sandwich SOP*
8	**Spicy Paneer Patty**	4 Mins	170	1 Pcs	*As per Burger/Sandwich SOP*

3. Preparation Steps

1. **Loading:** Place the exact portion into the fryer basket. Do not overfill the basket, as this drops the oil temperature rapidly.
2. **Frying:** Submerge the basket and set the timer for **4 Minutes**. Shake the basket gently halfway through to ensure even browning.
3. **Draining:** Once the timer rings, lift the basket and hang it over the fryer for **30 seconds** to drain excess oil.
4. **Seasoning:** For French Fries and Pops, toss in a clean mixing bowl with the proprietary Badi Katori seasoning while hot.

4. Plating & Presentation

- **Accompaniments:** Place the specified dips in branded portion cups. For delivery orders (Zomato/Swiggy), ensure lids are snapped on tightly.
- **Packaging:** Use vented Badi Katori boxes to ensure the steam escapes, keeping the items crispy until they reach the customer.
- **Visual Check:** Items should be golden-brown. If an item is dark brown (burnt) or pale (under-fried), it must be discarded and logged in the **Petpooja Wastage Module**.

Ustaad's Note:

The secret to our success is the 170°C/4-minute rule. Never rush the process by increasing the heat, as it will cook the outside but leave the inside cold.

Standard Operating Procedure (SOP): Beverages & Mixes

To ensure every drink served at **Badi Katori** has the exact flavor profile intended by the brand, the **Chaat Counter Boys** and **Ustaad** must follow these precise measurements and blending times.

---

1. Cold Beverages (Blended & Shaken)

Category	**Item Nos.**	**Weight (Premix)**	**Output**	**Ingredients Required**	**Standard Operating Procedure (SOP)**
Cold Coffees	1-8	27g - 29g	280-290 ml	175ml Milk + 75g Ice	1. Add milk and pouch contents to blender. 2. Add ice and blend for **45 seconds**.

					3. Serve chilled in a serving glass.
Frappes	9-14	38g - 39g	280-290 ml	125ml Milk + 125g Ice	1. Add milk and pouch contents to blender. 2. Add ice and blend for **45 seconds**. 3. Serve chilled.
Bubble Tea	15-24	46g - 58g	300-315 ml	100ml Milk + 100ml Water + 100g Ice	1. Add milk, water, and ice to blender. 2. Add pouch contents and blend for **45 seconds**. 3. Pour into serving glass and serve chilled.
Coolers	25-42	29g - 50g	300-315 ml	150ml Water + 150g Ice	1. Add water and pouch to shaker glass.

					2. Add ice and shake vigorously for **30 seconds**. 3. Pour into serving glass.
Cold Coco	43-45	51g - 53g	280-290 ml	175ml Milk + 75g Ice	1. Add milk and pouch contents to blender. 2. Add ice and blend for **45 seconds**. 3. Serve chilled.
Smoothies	54-57	58g - 83g	250 ml	100ml Water + 150g Ice	1. Mix premix in water and leave for **5 mins**. 2. Add mix and ice to blender. 3. Blend on low speed for **90 seconds**.
Ice Tea	64-72	27g - 30g	300-315 ml	150ml Water + 150g Ice	1. Add water, pouch, and ice to shaker.

					2. Shake vigorously for **30 seconds**. 3. Pour into serving glass.
Lassi	73-85	35g - 60g	200-220 ml	200g Curd (Dahi)	1. Add curd and pouch to a vessel. 2. Use electric whisker for **30s** or manual for **60s**. 3. Serve chilled.
Fruit Shakes	100-104	44g - 56g	285-300 ml	125ml Milk + 125g Ice	1. Add milk, ice, and pouch to blender. 2. Blend for **45 seconds** and serve chilled.
Cheesecake Shakes	105-110	44g - 62g	285-300 ml	125ml Milk + 125g Ice	1. Add milk, ice, and pouch to blender. 2. Blend for **45 seconds** and serve chilled.

Mocktails	110-114	40g - 48g	285-300 ml	150ml Soda + 150g Ice	1. Shake 50ml water, ice, and pouch for **30s**. 2. Pour into glass; top with 150ml soda and stir.

2. Hot Beverages

Category	Item Nos.	Weight (Premix)	Output	Ingredients Required	Standard Operating Procedure (SOP)
Hot Coffee	46-53	13g - 69g	150 ml	150ml Hot Milk	1. Add hot milk and pouch to a cup. 2. Mix well with a spoon to ensure no lumps. 3. Serve hot.
Milk Based (Hot)	58-61	25g - 31g	160-175 ml	150ml Hot Milk	1. Mix pouch in 50ml hot milk. 2. Once thick, add remaining 100ml milk; stir for **1 min**.

Water Based (Hot)	62-63	9g	150 ml	150ml Hot Water	1. Mix pouch into hot water, stir well, and serve.
Hot Tea (Sugar Free)	94-99	5g - 10g	150 ml	50ml Water + 100ml Milk	1. Heat water and milk to a boil. 2. Add pouch, stir well, strain, and serve hot.

3. Specialized Shots & Smoothies

Category	Item Nos.	Weight (Premix)	Output	Ingredients Required	Standard Operating Procedure (SOP)
Fruit Shots	115-116	58g - 67g	300 ml	100ml Water + 150g Ice	1. Mix premix in water and leave for **3-4 mins**. 2. Blend with ice for **60 seconds** and serve.

4. Beverage Quality Standards

- **Ice Quality:** Use only RO-water ice cubes. Never use "crushed ice" from outside vendors.
- **Blending Time:** Always use a timer. Under-blending leaves lumps; over-blending makes the drink watery.
- **Branding:** All beverages must be served in **Badi Katori branded glassware** or delivery bottles with **specialized lids**.

- **Verification:** The **Outlet Incharge** must randomly check the weight of the premix pouches to ensure we are following the **Upfront Ordering** stock precision.

Staff Note:

Consistent measurements equal consistent taste. Whether a customer is in Adajan or Vesu, the drink must taste the same!

Standard Operating Procedure (SOP): Chaat Assembly & Garnishing

To maintain the signature "Badi Katori" visual appeal and flavor profile, the **Chaat Counter Boys** must follow this assembly guide strictly. Consistency in garnishing ensures that every plate served across Surat looks identical and premium.

---

1. Base Assembly Guidelines

- **Temperature:** Hot bases (Samosa, Tikki, Kachori) must be fresh and crispy. Cold bases (Bhalla, Papdi) must be chilled.
- **The "Pour" Standard:** Chutneys should be drizzled in a zig-zag pattern, never dumped in one spot.
- **Dahi Consistency:** Use the **Reelo** feedback to ensure dahi thickness is maintained. It must be whisked smooth, chilled, and slightly sweetened.

---

2. Assembly & Ingredient Matrix

Category	**Variant**	**Mandatory Ingredients & Garnishes**
ALOO TIKKI	**Chaat**	Green Chutney, Sonth, Dahi, Nylon Sev, Laal Masala, Coriander

	Chole	Green Chutney, Sonth Chutney, Laal Masala
	Ragda	Green Chutney, Sonth, Nylon Sev, Laal Masala, Coriander
SAMOSA	**Regular**	Green Chutney, Sonth Chutney
	Chaat	Green Chutney, Sonth, Dahi, Nylon Sev, Laal Masala, Coriander
	Chole	Green Chutney, Sonth, Laal Masala, Saunf Masala, Coriander
	Ragda	Green Chutney, Sonth, Nylon Sev, Laal Masala, Coriander
	Kadi	Ratlami Sev, Laal Masala, Coriander
KACHORI	**Regular**	Green Chutney, Sonth Chutney
	Chaat	Green Chutney, Sonth, Dahi, Nylon Sev, Laal Masala, Coriander
	Chole	Green Chutney, Sonth, Laal Masala, Coriander

	Ragda	Green Chutney, Sonth, Nylon Sev, Laal Masala, Coriander
	Kadi	Ratlami Sev, Laal Masala, Coriander
CHOLE	**Bhatura/Kulcha**	Green Chutney, Coriander
RAGDA	**Kulcha**	Green Chutney, Coriander
BHALLA	**Chaat/Papdi**	Green Chutney, Sonth, Dahi, Nylon Sev, **Carrot, Beetroot**, Coriander
	Raj Kachori	Green Chutney, Sonth, Dahi, Nylon Sev, Surti Mix, Tikhi Boondi, Laal Masala, Saunf Masala, **Carrot, Beetroot**, Coriander
	BADI KATORI	Green Chutney, Sonth, Dahi, Nylon Sev, Surti Mix, Tikhi Boondi, Laal Masala, Saunf Masala, **Carrot, Beetroot**, Coriander
PURI	**Dahi Puri**	Green Chutney, Sonth, Dahi, Nylon Sev, Laal Masala, Coriander
	Masala Puri	Nylon Sev, Laal Masala, Coriander

	Sev Puri	Green Chutney, Sonth, Nylon Sev, Laal Masala, Coriander
MURMURA	**Chowpaty/Jhal**	Green Chutney, Sonth, Nylon Sev, Surti Mix, Tikhi Boondi, Chapta Chana, Chana Dal, Laal Masala, Saunf Masala, **Carrot, Beetroot**, Coriander
	Dahi Chowpaty	Green Chutney, Sonth, Dahi, Nylon Sev, Surti Mix, Tikhi Boondi, Chapta Chana, Chana Dal, Laal Masala, Saunf Masala, **Carrot, Beetroot**, Coriander
PALAK	**Patta Chaat**	Green Chutney, Sonth, Dahi, Nylon Sev, Surti Mix, Tikhi Boondi, Chapta Chana, Chana Dal, Laal Masala, Saunf Masala, **Carrot, Beetroot**, Coriander

3. Specialized Garnishing Steps

1. **The "Surti" Touch:** For Raj Kachori, Badi Katori, and Murmura items, ensure the **Surti Mix** and **Tikhi Boondi** are crunchy (check daily).
2. **Color Contrast:** Carrot and Beetroot must be finely grated. Place them on top of the dahi/chutney layer to provide a vibrant contrast against the green coriander.
3. **Masala Dusting:Laal Masala** and **Saunf Masala** should be dusted lightly from a height for even distribution. Never clump the masala in one spot.
4. **Sev Application:Nylon Sev** is our signature finish. It should cover the top layer generously but should not fall off the sides of the plate.

---

4. Delivery Dispatch (Zomato/Swiggy)

- **Separation:** For items like Samosa Ragda or Chole Bhatura, package the liquid (Ragda/Chole) in a leak-proof container and the dry base separately to prevent sogginess.
- **Chutney Packets:** Always include extra small pouches of Green and Sonth chutney for delivery orders.
- **Final Visual Check:** Before sealing the bag, ensure no dahi or chutney has leaked onto the rim of the container.

Ustaad's Quality Note:

The eye eats before the mouth. If the Beetroot and Carrot garnish isn't fresh, the whole dish looks dull. Keep your garnishing station organized and chilled at all times.

4. Plating & Presentation Standards

Standard Operating Procedure (SOP): Visual Excellence & Serving Protocols

At **Badi Katori**, we believe the "first bite" is taken with the eyes. Our presentation must reflect the premium nature of our brand, ensuring every plate is Instagram-ready for our customers and micro-influencers.

---

1. The "Clean Slate" Rule

- **Plate Integrity:** Before assembly, inspect every plate or bowl. Any item with chips, cracks, or visible stains must be discarded immediately.
- **Rim Hygiene:** The rim (outer edge) of the plate must remain completely clean. If any chutney, dahi, or spice falls on the rim during assembly, the **Chaat Counter Boy** must wipe it away with a clean, food-grade tissue before serving.
- **Branded Placement:** Ensure the **Badi Katori** logo on the liner or container is upright and facing the customer.

---

2. Layering & Architecture

To ensure our chaat doesn't look like a "messy mix," follow the **Vertical Layering** technique:

1. **The Base:** Place the hot item (Tikki/Samosa) or the Katori base in the center.
2. **The Sauce Foundation:** Pour Dahi first (if applicable), followed by Green Chutney, and then Sonth. Use a circular motion to ensure the colors are distinct and visible.
3. **The Crunch Layer:** Apply **Nylon Sev**, **Tikhi Boondi**, or **Surti Mix** over the chutneys. This prevents the crunchies from getting soggy too quickly.
4. **The Signature Garnish:** Place grated **Carrot** and **Beetroot** in the center-top. Finish with a fresh sprinkle of bright green **Coriander**.
5. **The Masala Dusting:** A final light flick of **Laal Masala** or **Saunf Masala** over the dahi to add depth.

---

3. Beverage Presentation (Reelo Standard)

- **Glassware Excellence:** Use only the specialized **Badi Katori branded glassware**. Ensure there are no water spots or fingerprints on the glass.
- **The Lid Lock:** For both dine-in and takeaway, the lid must be pressed down until a "click" is heard.
- **Straw Protocol:** Serve with a paper straw placed beside the glass (for dine-in) or tucked securely into the packaging (for delivery).

---

4. Delivery (Zomato/Swiggy) Aesthetics

- **Anti-Soggy Engineering:**
    - For **Samosa/Tikki Chaat**, place the base items in the main compartment and the Ragda/Chole in a separate leak-proof container.
    - Place a small parchment divider between fried items and cold chutneys if they share a box.
- **The Seal of Trust:** Apply the **Badi Katori** safety seal over the bag's opening. A neat, untampered bag increases our Reelo feedback scores.

---

5. Presentation Audit (Visual Checklist)

The **Outlet Incharge** must verify these 5 points before any order leaves the counter:

1. **Vibrancy:** Are the Green, Red (Sonth), and White (Dahi) colors distinct?
2. **Garnish:** Are the Beetroot and Carrot fresh and brightly colored?
3. **Cleanliness:** Is the rim of the bowl/plate spotless?
4. **Temperature:** Is the steam rising from the hot items? Is the beverage glass chilled?
5. **Branding:** Is the bill attached neatly and the logo visible?

---

6. Service Etiquette

- **Placement:** Place the dish gently in front of the customer. Do not slide it across the table.
- **Orientation:** The "Best Face" of the dish (the side with the most colorful garnish) should face the customer.
- **The "Enjoy" Greeting:** Always say: *"Please enjoy your Badi Katori Signature [Item Name]."*

Management Note:

Our micro-influencer campaigns in Surat rely on how our food looks in photos. One messy plate can hurt our digital reputation. Take the extra 5 seconds to make it perfect.

Packaging Standards

Standard Operating Procedure (SOP): Delivery vs. Dine-in Packaging

At **Badi Katori**, how we wrap our food is as important as how we cook it. We have two distinct standards: **Dine-in** focuses on "The Visual Wow," while **Delivery (Zomato/Swiggy)** focuses on "The Structural Integrity."

---

1. Dine-in Presentation (The Experience)

Focus: Aesthetics, Freshness, and Immediate Enjoyment

- **Plating:** Use only high-quality, sanitized Badi Katori ceramic or premium Melamine plates (per outlet tier).

- **Liners:** Every plate must have a fresh **Badi Katori branded greaseproof liner** to prevent the base (Samosa/Tikki) from slipping.
- **Beverages:** Serve in the **specialized branded glassware**. The lid should be off unless requested by the customer, and a paper straw should be provided on the side.
- **Accompaniments:** Chutneys and dips are served directly on the plate in artistic swirls or in small reusable ramekins.
- **The Tray:** All items must be carried on a clean tray. Never hand a plate directly to a customer by holding the rim with your fingers.

---

2. Delivery Packaging (The Protection)

Focus: Heat Retention, Spill-Prevention, and Anti-Sogginess

Product Type	**Primary Packaging**	**Secondary Packaging**	**Critical Instruction**
Fried Items (Fries, Pops)	**Vented** Badi Katori Box	Branded Paper Bag	Do not seal the bag completely; allow steam to escape so they stay crispy.
Gravy Chaat (Ragda/Chole)	Leak-proof PP Container	Reusable Outer Box	Pack the Ragda/Chole in a separate 250ml container; keep the Samosa/Tikki dry in the main box.
Signature Beverages	Specialized Glass/Bottle	**Click-Lock Lid**	Ensure the lid "clicks." Place in a cup-holder insert inside the delivery bag.

Pani Puri	8-hole Puri Tray	500ml Spout Pouch	Pani (water) must be sent in a sealed pouch to prevent leakage into the Puris.

---

3. The "Anti-Soggy" Protocol for Delivery

To maintain our **New Menu** standards during a 20-minute Surat traffic transit:

- **Separate the Wet & Dry:** Never pour Ragda, Chole, or Dahi over fried bases for delivery. Provide them in separate "portion cups" so the customer can assemble them fresh at home.
- **Ventilation:** All fried snack boxes must have ventilation holes. If the steam stays inside, the "Badi Katori Crunch" is lost.
- **Cold vs. Hot:** Never place a chilled Beverage glass in the same bag as a hot Aloo Tikki. Use separate bags or a thermal divider to maintain temperatures.

---

4. The "Final Seal" & Dispatch

- **Cutlery & Napkins:** Include 2 napkins and the required wooden spoons/forks based on the order size.
- **The Safety Seal:** Every delivery bag must be closed with a **Badi Katori Tamper-Evident Sticker**. This reassures the customer of hygiene and safety.
- **The Bill:** Staple the **Petpooja** bill to the outside of the bag, ensuring the "Revised Rates" and "Itemized List" are clearly visible for the rider to verify.

---

5. Inventory Management of Packaging

- **Upfront Ordering:** The **Outlet Incharge** must monitor the stock of specialized lids and branded boxes. Since these are proprietary, local market substitutes are **strictly prohibited**.
- **Wastage:** If a delivery box is crushed or a lid is faulty, log it as "Packaging Wastage" in Petpooja to maintain accurate inventory for the next **upfront payment** cycle.

Staff Reminder:

For Dine-in, we are selling a 'Vibe.' For Delivery, we are selling 'Convenience.' If a Zomato customer receives a soggy Samosa, we lose a Reelo member. Pack with pride!

4. Hygiene & Food Safety Standards

Standard Operating Procedure (SOP): Personal Grooming & Protective Gear

At **Badi Katori**, hygiene is our first ingredient. As a brand that serves high-traffic areas across Surat, our staff must reflect the cleanliness and professionalism of our central kitchen. The following protocols are mandatory for the **Badi Katori Family**.

---

1. Uniform & Personal Appearance

- **Cleanliness:** Every staff member must wear a freshly laundered **Badi Katori branded uniform** daily. Uniforms with visible stains (chutney, oil, or grease) are not permitted on the floor.
- **Footwear:** Closed-toe, non-slip black shoes are mandatory. They must be polished and clean.
- **Accessories:** For food safety, watches, rings, bracelets, or dangling jewelry are **strictly prohibited** during work hours as they can harbor bacteria or fall into the food.
- **Nails:** Nails must be trimmed short and kept clean. No nail polish or artificial nails are allowed for anyone handling food or beverages.

---

2. Hairnet & Headgear Protocol

- **100% Coverage:** The **Ustaad**, **Chaat Counter Boys**, and **Housekeeping Boy** must wear a hairnet or the official Badi Katori cap at all times.
- **Application:** All hair must be tucked inside the cap/net. For staff with long hair, it must be tied in a bun before putting on the headgear.
- **Beard Hygiene:** Staff with facial hair must wear a **beard net** (snood) while in the kitchen or assembly area to ensure no hair falls into the signature "Katoris."

---

3. Glove & Hand Hygiene Protocol

We follow a **"Zero Direct Contact"** policy for all ready-to-eat items.

- **Hand Washing:** Hands must be washed for **20 seconds** with soap and warm water:
  - Before starting a shift.
  - After using the restroom.
  - After touching trash or cleaning tools.
  - After sneezing, coughing, or touching the face.
- **Glove Usage:**
  - **Blue Nitrile/Vinyl Gloves** must be worn by Chaat Counter Boys and the Ustaad during food assembly and plating.
  - **When to Change:** Change gloves every **2 hours**, or immediately if they are torn, or after switching from raw prep to cooked food.
  - **The Golden Rule:** Wearing gloves is not a substitute for washing hands. Always wash hands *before* putting on a new pair.

---

4. Mask & Breath Safety

- **Assembly Area:** Staff at the open-facing chaat counter must wear a face mask or a transparent mouth shield. This prevents accidental droplets from contaminating the food while speaking to customers or coworkers.
- **Illness Policy:** Any staff member showing symptoms of cold, cough, or fever must report to the **Outlet Incharge** immediately and will be prohibited from handling food.

---

5. Housekeeping Specific Standards

- **Color-Coded Cleaning:** The **Housekeeping Boy** must use separate gloves for cleaning the dining area (Yellow) and the restrooms (Red). These gloves must never enter the kitchen area.
- **Apron Protocol:** Housekeeping must wear a heavy-duty waterproof apron when deep-cleaning the floor or washing the **specialized glassware**.

---

6. Daily Hygiene Audit

The **Outlet Incharge** will conduct a "Line-Up Check" every morning:

1. Are all uniforms ironed and clean?
2. Is hair fully covered?
3. Are fingernails trimmed?
4. Are all workstations stocked with fresh gloves and sanitizer?

Staff Reminder:

Our customers in Surat trust Badi Katori for its quality. Hygiene is a sign of respect for our food and our guests. If you look clean, the food feels safe.

4. Hygiene & Food Safety Standards

Standard Operating Procedure (SOP): Kitchen Sanitation & Deep-Cleaning

A clean kitchen is the foundation of the **Badi Katori** taste. Because we handle high volumes of fried items and dairy-based beverages, grease and residue can build up quickly. This schedule ensures every Surat outlet remains "audit-ready" at all times.

---

1. Daily Cleaning Cycles

Frequency	**Area / Equipment**	**Responsibility**	**Task Description**
Every 2 Hours	**Chaat Counter**	Counter Boy	Wipe down stainless steel surfaces with food-grade sanitizer. Clean spills immediately.

After Every Use	**Blender Jars**	Beverage Incharge	Rinse with RO water and sanitize. Ensure no milk/fruit residue remains.
Post-Peak Hour	**Floor (Kitchen)**	Housekeeping	Sweep and mop with degreaser to prevent oil-slick accidents.
Closing (Daily)	**Fryers & Vats**	Ustaad	Filter oil (if reusable) or discard. Scrub the vat walls to remove carbon buildup.

2. The Nightly Deep-Clean Protocol (End of Shift)

Before the **Outlet Incharge** signs off for the night, the following **Deep-Clean** must be completed:

- **Refrigeration Units:** Wipe down the gaskets (rubber seals) of the **-18°C Deep Freezers**. Ensure no ice buildup is blocking the doors, as this affects our **1-year shelf life** stock.
- **Drainage Systems:** Pour hot water and disinfectant down all kitchen drains to prevent odors and pests.
- **Induction & Heating:** Clean the surface of all induction cooktops and sandwich grillers using a non-abrasive scrubber.
- **Wall Tiles:** Scrub the tiles behind the frying station to remove airborne grease.
- **Trash Management:** Empty all bins, wash them with disinfectant, and line them with fresh bags for the next morning.

---

3. Weekly Maintenance & Sanitation

Every Sunday night (or the designated slow night for your Surat location), the team must perform a **Grand Sanitation**:

1. **Exhaust Chimneys:** Remove filters and soak them in heavy-duty degreaser. Clean filters ensure a smoke-free environment for the "Badi Katori Family."
2. **Storage Racks:** Remove all dry stock and wipe down the shelves in the BOH area.
3. **Glassware Descaling:** Perform a deep-clean of all **specialized branded glassware** to remove any water spots or milk film, ensuring they are crystal clear.
4. **Pest Control Check:** Inspect corners and behind heavy equipment for any signs of pests. Report findings in the **Daily Excel Report**.

---

4. Chemical & Tool Safety

- **No Cross-Contamination:** Never use the same mop/cloth for the restroom and the kitchen. Use **Color-Coded Tools** (e.g., Red for Restroom, Green for Kitchen).
- **Storage:** All cleaning chemicals must be stored in a locked cabinet **away from food products** to prevent accidental poisoning.
- **Labeling:** Ensure all spray bottles are clearly labeled (e.g., "Sanitizer," "Degreaser").

---

5. The "White Glove" Audit

The **Outlet Incharge** must perform a daily inspection before opening:

- **Touch Test:** Run a finger along the top of the fridge and the side of the fryer. If there is grease, it is not clean.
- **Smell Test:** The kitchen should smell like fresh spices, not stale oil or drains.
- **Visual Test:** Check the **specialized lids** and packaging area—it should be dust-free and organized.

Ustaad's Quality Tip:

Cleanliness is not a chore; it is a discipline. A clean kitchen works faster, breaks down less often, and keeps our customers coming back to a brand they can trust.

Standard Operating Procedure (SOP): Oil Quality Monitoring & Disposal

The "Badi Katori Crunch" depends entirely on the quality of our frying oil. Stale or degraded oil ruined the taste of our proprietary frozen bases and creates health risks. Every **Ustaad** must follow these protocols to ensure our fried items remain light, crispy, and gold-standard.

---

1. Daily Oil Inspection (The Morning Ritual)

Before starting the first fry of the day at **170°C**, the Ustaad must inspect the oil using three criteria:

- **Color:** The oil should be clear and golden. If it is dark brown or "coffee-colored," it must be replaced.
- **Odour:** Fresh oil has a neutral scent. If the oil smells "fishy," "nutty," or "soapy," it has oxidized and is unfit for use.
- **Smoke Point:** If the oil begins to smoke before reaching the target 170°C, it has broken down chemically and must be discarded.

---

2. Total Polar Materials (TPM) Monitoring

To stay compliant with food safety regulations and maintain **Badi Katori** quality:

- **TPM Testing:** Use a digital TPM meter or oil test strips every afternoon before the evening rush.
- **The Limit:** If the TPM reading exceeds **25%**, the oil is considered "spent." It must be drained and replaced immediately. Serving food fried in oil above 25% TPM is a violation of brand standards.

---

3. Operational Best Practices

To extend the life of our oil and maintain the **1-year shelf life** quality of our products:

- **Skimming:** Use a fine-mesh skimmer every **30 minutes** to remove "floaties" or burnt food particles. Leftover particles carbonize and darken the oil.

- **No Salt in the Fryer:** Never salt French Fries or Pops directly over the fryer. Salt is the greatest enemy of oil life; always season in a separate mixing bowl.
- **Cover Up:** When the outlet is closed or during slow afternoon hours, keep the fryer lids on to prevent dust and light from oxidizing the oil.

---

4. Filtration & Topping Up

- **Nightly Filtration:** Every night, once the oil cools slightly, it must be filtered through a micro-filter cloth to remove microscopic sediments.
- **Topping Up:** You may add fresh oil to "top up" the levels to the **MAX line**, but never mix fresh oil with extremely degraded oil. If the base oil is bad, a top-up will not save it.

---

5. Eco-Friendly Disposal Protocol

Badi Katori is committed to the environment. Used Cooking Oil (UCO) must never be poured down the kitchen drains, as this causes clogs and violates Surat municipal laws.

1. **Cooling:** Allow the spent oil to cool completely before handling.
2. **Storage:** Pour the used oil into the designated "Used Oil Barrels" (blue containers) kept in the BOH area.
3. **Collection:** Coordinate with the **Surat Head Office** authorized biodiesel collection agency.
4. **Logging:** Record the date and quantity (in liters) of oil discarded in your **Daily Excel Sheet**. This helps track "Oil Yield" and prevents internal theft.

---

6. Safety Warning

- **Water Hazard:** Never allow water to come into contact with hot oil. Ensure all baskets and frozen items (Fries/Pops) are free of excess ice crystals before dropping them into the vat.
- **Burn Prevention:** Use heat-resistant gloves when draining the fryer.

Ustaad's Note:*Good oil is an investment in our flavor. If you try to save money by using old oil, you will lose money through lost customers. Quality first, always.*

4. Storage Protocols

Standard Operating Procedure (SOP): FIFO (First-In, First-Out) Method

At **Badi Katori**, we leverage advanced frozen technology that provides a **1-year shelf life**. However, to ensure that our customers always receive the freshest possible product and to prevent "dead stock," we strictly enforce the **FIFO (First-In, First-Out)** method.

---

1. The FIFO Golden Rule

The principle is simple: **The stock that arrives at the outlet first must be sold first.**

This prevents older stock from being pushed to the back of the freezer and forgotten, ensuring we never serve a product that has lost its peak quality.

---

2. Receiving & Labeling Protocol

Every time a delivery arrives from our central supply chain:

- **Check the Date:** The **Outlet Incharge** must inspect the "Manufacturing Date" and "Expiry Date" on every carton of frozen bases and premixes.
- **Date Marking:** If the date is not clearly visible, use a permanent marker to write the **Arrival Date** on the outside of the box in large, clear letters.
- **The Log:** Immediately enter the batch details and quantity into the **Excel Stock Sheet**.

---

3. Storage Execution (Inside the Freezer/Racks)

When loading the **-18°C Deep Freezers** or the dry storage racks:

- **Rear Loading:** New stock must always be placed **behind** or **underneath** the existing stock.
- **Front Facing:** Older stock must be moved to the **front** (on shelves) or **top** (in deep freezers) so that it is the first thing the **Ustaad** reaches for.

- **Organization:** Group items by category (e.g., all Fries together, all Katori bases together). Never mix batches in a single pile.

---

4. Daily "Pouch" Check

- **The Morning Routine:** During the morning inventory count, the **Counter Boy** must ensure that the open packets from the previous day are used before opening a new carton.
- **Seal Integrity:** If a packet is opened but not fully used, it must be sealed with a clip and labeled with the date it was opened. Under FIFO, these "Open-Label" items are priority #1 for use.

---

5. Dry Stock & Beverage FIFO

FIFO isn't just for food; it applies to everything in the Badi Katori inventory:

- **Beverage Premixes:** Use pouches from the oldest batch first.
- **Packaging:** Use the oldest stock of **specialized lids** and branded boxes first to prevent dust buildup on older inventory.
- **Syrups/Sauces:** Even with long shelf lives, the flavor is best when fresh. Rotate your sauce bottles daily.

---

6. Monitoring & Auditing

- **Weekly Rotation Audit:** Every Sunday, during the deep clean, the **Outlet Incharge** must physically move all stock to verify that no "hidden" old stock is sitting at the bottom of the freezer.
- **Short-Expiry Alert:** If any stock is found to be within 30 days of expiry (despite our 1-year window), it must be flagged in the **Excel Sheet** and prioritized for "Micro-Influencer" sampling or special promotions to clear it immediately.

---

7. Visual Aids for Staff

To make FIFO easy for the **Badi Katori Family**:

- **Green Stickers:** Place a green sticker on the "Current Batch" to be used.

- **Red Stickers:** Place a red sticker on "New Arrivals" that should not be opened until the green-stickered batch is finished.

Staff Reminder:

Ignoring FIFO leads to "Stock Aging." Even if a product has a 1-year shelf life, fresh stock always tastes better. Protect the Badi Katori brand by rotating your stock every single day.

Standard Operating Procedure (SOP): Managing 1-Year Shelf Life Frozen Stock

The success of the **Badi Katori** model relies on our high-quality frozen bases. While these items are engineered with a **1-year shelf life**, maintaining that quality requires strict temperature discipline. If the "Cold Chain" is broken, the texture of our signature crunch is compromised.

---

1. The "Zero Thaw" Mandate

To preserve the structural integrity of our proprietary frozen items:

- **Direct-to-Fryer:** Items must move directly from the **-18°C freezer** into the **170°C oil**.
- **The Danger of Thawing:** Never leave frozen packets on the kitchen counter "to soften." Thawing causes ice crystals to melt into the breading, leading to soggy products and excessive oil splattering.
- **Small Batch Retrieval:** Only take out the number of pouches needed for immediate orders. Keep the rest of the carton sealed inside the freezer.

---

2. Temperature Control & Monitoring

- **The -18°C Standard:** Our deep freezers must be maintained at a constant **-18°C (0°F)** or colder.

- **Hourly Checks:** The **Outlet Incharge** must check the digital thermometer on the freezer every 2 hours.
- **The Power Backup Rule:** In the event of a power cut in Surat, keep the freezer doors **tightly shut**. Our specialized insulation can maintain the cold for several hours if the seal is not broken.

---

3. Freezer Organization & Hygiene

- **Airflow Spacing:** Do not overstuff the freezer. Leave a **2-inch gap** between the stock and the freezer walls to allow cold air to circulate evenly.
- **Off-the-Floor Storage:** Never store frozen cartons directly on the floor. Use pallets or shelving units to prevent contamination and allow for easy cleaning.
- **Gasket Integrity:** Once a week, wipe the rubber door seals with a dry cloth. If you notice "frost buildup" (ice on the edges), it means the seal is leaking air and needs immediate repair.

---

4. Inventory Traceability

Because our stock lasts for 12 months, tracking batches is essential for quality audits:

- **Batch Coding:** When a new shipment arrives, enter the **Batch Number** and **Expiry Date** into the **Daily Excel Sheet**.
- **Carton Integrity:** Keep items in their original Badi Katori outer cartons as long as possible. These boxes provide an extra layer of thermal protection against "freezer burn."
- **First-Expiry-First-Out (FEFO):** Always check the manufacturer's date. Even if two boxes look the same, the one with the closer expiry date must be moved to the top of the stack.

---

5. Quality "Red Flags"

If you notice any of the following, the stock may have been compromised during transit or storage:

- **Clumping:** If the fries or pops are stuck together in a solid block, the bag has thawed and refrozen. **Do not serve.**
- **Ice Crystals:** Large "snow-like" crystals inside the bag indicate a temperature fluctuation (Freezer Burn).
- **Odor:** If the frozen product has absorbed smells from the freezer, it indicates the bag was not sealed correctly.

---

6. Waste Logging

If any 1-year shelf life stock is discarded due to freezer failure or contamination:

1. **Photograph:** Take a photo of the batch number and the spoiled product.
2. **Petpooja Entry:** Log the weight as "Stock Wastage."
3. **Report:** Inform the **Badi Katori Supply Chain** team so we can investigate if the issue occurred during the "Upfront" delivery or at the outlet level.

Ustaad's Quality Note:*Our frozen technology is what allows us to serve the same perfect taste in every Surat neighborhood. Treat the freezer as the most important piece of equipment in the kitchen. If the cold chain stays unbroken, our brand stays strong.*

5. Administration & Compliance

Standard Operating Procedure (SOP): Administrative Management

This section outlines the professional standards for personnel management, brand protection, and corporate communication within the **Badi Katori** network.

---

1. Employee Register & Attendance

To maintain a high-performance culture in our Surat outlets, the following protocols are mandatory:

- **Daily Attendance:** All staff (Ustaad, Counter Boys, and Housekeeping) must log their "In" and "Out" times in the **Daily Excel Sheet**.
- **Grooming Check:** Attendance is only marked *after* the staff member has passed the **Personal Grooming Audit** (Clean uniform, hairnet/cap, and trimmed nails).

- **Shift Discipline:**
    - **Punctuality:** Staff must arrive **15 minutes** prior to their shift for the morning "Muster Call."
    - **Leave Policy:** Planned leaves must be requested **7 days in advance**. Emergency leaves require notification **4 hours** before the shift via the official WhatsApp group.
- **Records:** The **Outlet Incharge** must maintain a physical file for every employee containing a copy of their Government ID (Aadhar), emergency contact, and a signed **Hygiene & NDA Agreement**.

---

2. Franchise Transfer & Audit Policies

To ensure the **Badi Katori** name remains synonymous with quality, we implement strict oversight:

- **Transfer of Ownership:**
    - Franchises cannot be transferred or sold without **written approval** from the Surat Headquarters.
    - New partners must undergo a 7-day mandatory training on **Petpooja operations** and the **Recipe Vault**.
- **The Audit Protocol:**
    - **Operational Audits:** Conducted monthly to check **FIFO compliance**, oil TPM levels (Max 25%), and stock integrity.
    - **Inventory Reconciliation:** We cross-check **Petpooja sales** against **Upfront Frozen Stock orders**. Any unauthorized local sourcing is a violation of the franchise agreement.
    - **Financial Compliance:** Outlets must ensure the **March 2026 Revised Rates** are implemented across Zomato and Swiggy.

---

3. Official Contact Directory (Surat Headquarters)

For operational support, logistics, and emergencies, use the following hierarchy.

Note: For all general queries, please reference your **Outlet Code** in the subject line.

Department	Contact Area	Primary Channel
Supply Chain	Frozen Stock, Beverages, Packaging	Official WhatsApp - Logistics
Operations (Service Lane)	SOP Training, Audit Appeals, Retraining	Email: ops@servicelane.in
Marketing & PR	Micro-Influencer Collabs, Reelo Feedback	Marketing Dashboard / WhatsApp
Technical Support	Petpooja Issues, Digital Menu Updates	IT Support Line
Accounts	Upfront Payments, Invoicing, Franchise Fees	Finance Department

4. Communication Protocol

- **Internal Communication:** All official announcements regarding new menu launches or policy changes will be shared through the **"Badi Katori Family"** official group.
- **External Communication:** Staff are prohibited from speaking to the media or sharing proprietary Recipe Vault details with outside vendors. All media inquiries must be directed to the **Surat Headquarters**.

Management Note:

Transparency and discipline in our administration allow our outlets to focus on what they do best: serving the best chaat in Surat. Follow these guidelines to ensure a smooth, profitable partnership.
